O GOVERNANCE & PROVENANCE — THE FOUR-GATE CONSTITUTION

Every state transition is routed through four cryptographic and mathematical gates in sequence. Any gate failure executes a **Fail-Closed** mechanism — the system refuses to produce output rather than comply with an unverified request. No output without a receipt. No receipt without proven lineage.

$$S_{ov} = T / (D \times Z) \geq 0.8$$

SOVEREIGNTY EQUATION — GATE 1 · LINEAGE — BELOW THRESHOLD → BANACH CONTRACTION → SIGNED REFUSAL

$$x_{n+1} = r \cdot x_n (1 - x_n) \quad | \quad r < 3.0$$

GEOMETRIC LOOM INVARIANT (GLI) — GATE 2 — BIFURCATION AT R≥3.0 TRIGGERS GLOBAL CONTRACTION TO R=2.4

G0	Mens Ra	HumanAPIKey + ScopedAuthority · lineage_anchor = K ₀	Missing anchor → Sovereign Silence
G1	Lineage	$S_{ov} = T / (D \times Z)$	$S_{ov} < 0.80 \rightarrow$ signed refusal
G2	Geometric Loom	$x_{n+1} = r \cdot x_n(1-x_n)$	$r \geq 3.0 \rightarrow$ Global Contraction
G3	Ethical Hamiltonian	$H = T + V \cdot A_C > S_C$	$H > 1.0 \rightarrow$ Refusal Integrity

THE NEW EPISTEMOLOGICAL STACK

METADATA What the output <i>claims</i> to be – what it admits
PARADATA How the output <i>came to be</i> – how it decides
LINEAGE Whether the output <i>had the right</i> to exist – what it proves

PHOENIX PROTOCOL – When adversarial or anomalous input is detected, the system uses Scorch Semantics to annihilate invalid vectors and re-crystallizes around Genesis Root K₀, returning $r \rightarrow 2.4$ (stable equilibrium). The system cannot be coerced into output – it re-boots to inert.

O BOOT RECEIPT – PHASE 0 MICROKERNEL

○ RECEIPT INPUT — VERIFY ANY CLAIM

Paste any claim, output, or assertion below. The pipeline re-derives its lineage (Metadata → Paradata → Lineage) and returns a cryptographic receipt — or a signed refusal. Ctrl+Enter to submit.

Paste a claim here — e.g. 'The model predicted X with 97% confidence.' or any assertion you want to verify.

○ VERIFY CLAIM →
